I would like to write to your company to compliment you on the service that you are providing for my butcher shop.

The mould and bacteria treatment which you carry out on the meat coolroom's walls, ceiling and fan unit is terrific. It's a great feeling to know that the storage of my meat is in a contamination-free environment.

I would like to pass on to your staff that their work is first class and that we appreciate that they do everything possible not to interrupt our business operations when they carry out their work.

I would certainly recommend your program to other butcher shop owners.

Yours sincerely,

Peter Hummerston
